Intrinsic Summary

Site is a land/water interface, perhaps land/water/structure interface, with a group of buildings of varying heights, dimensions & shapes, associated with vegetation, perhaps a "park or garden-like" or landscaped area. People are present, both ~~are~~ strolling & working; site seems to be oriented ~~at~~ along something.

Structure is relatively tall, with several dimensional components, with a sense of "overlooking" or "panoramic vision". Seem to be white/grey in color, smooth, perhaps made of concrete, with glass windows.

Area is a place of interest with a structure of growing interest which is tall, of larger diameter at top than at the bottom (similar to space needle). Top is accessed by elevator & has 2-3 levels, one of which is open w/ panoramic view, carpeted, quiet furnished; other is open, possibly on roof, with the source of an observation platform --- Place seems to be a center of interest, planned, perhaps his original.
